

Green Transportation Summit & Expo expands educational offerings, anticipating larger attendance than 2022

- Green Transportation Summit & Expo (GTSE) is expanding its educational tracks to offer attendees a broader array of subject matter expertise in battery-electric and alternative fuel mobility, policy, equity, and utilities.
- GTSE is anticipating it's largest ever conference attendance for this year's event and is excited to bring together industry leaders to share knowledge and experiences, fostering collaboration towards a greener transportation future.
- GTSE is partnering with transportation industry leaders to further the summit's impact , including the Washington Truck Association (WTA), Hydrogen Fuel Cell Partnership, Climate Solutions, and National Association of Fleet Administrators.

(Tacoma, WA) - The 12th Annual Green Transportation Summit & Expo (GTSE), the Pacific Northwest's largest transportation event, announces its expanded educational tracks to offer attendees a broader array of sessions and subject matter experts in battery-electric and alternative fuel mobility, decarbonization policy, centering equity in clean transportation, and utility coordination for fleet electrification. Conference organizers expect to eclipse last year's attendance records after a successful show in 2022, which saw the largest attendance in GTSE's 12-year history.

Who Attends The GTSE

"GTSE 2022 was our largest conference to date. We had more than 750 attendees, along with 50 sessions, plenaries and test drives," said Brian Trice, organizer of GTSE and executive director of the Columbia-Willamette Clean Cities Coalition. "With the expansion of our conference program, we look forward to welcoming more attendees and participants than ever."

In addition to the expanded program, GTSE is partnering with the transportation industry's leading organizations to further the summit's impact.

The Washington Truck Association (WTA) has served as the unified voice for the trucking industry in Washington since 1922. WTA is dedicated to advocating sound public policies, providing excellence in education, training, and information, as well as promoting a safe, dependable, and efficient motor transportation system.

The Hydrogen Fuel Cell Partnership is a collaborative nonprofit of like-minded organizations that are dedicated to advancing the market for hydrogen-powered fuel cell electric passenger cars, transit buses, trucks and other forms of transportation. H2FCP members identify and resolve challenges to market introduction and acceleration through regular communication, working jointly on tasks and projects, and sharing lessons learned.

Climate Solutions is the leading organization advancing climate-related policy in the Pacific Northwest and National Association of Fleet Administrators is the preeminent fleet management professionals organization in the country.

GTSE is excited to partner with these industry leaders to bring their shared knowledge and expertise to improve the program content quality and experience for all conference attendees.

About GTSE

The Green Transportation Summit & Expo (GTSE) is the Pacific Northwest's leading fleet modernization and sustainable transportation event. GTSE offers attendees an inside look at the latest in the fleet technologies and innovation and provides educational sessions which feature a who's who of national and regional transportation leaders.

The 12th Annual Green Transportation Summit and Expo is the region's best resource for fleets, community organizations, industry, policymakers, and thought leaders to join to advance green transportation. The event includes three days of networking, educational sessions, and vehicle walk-throughs and test drives.
