Green Transportation Summit & Expo (GTSE) and RE+ Events to Partner in Pacific Northwest

RE+ Events will co-locate their first regional event in the Northwest with Green Transportation Summit & Expo at its show in Tacoma, Washington, August 20-22

DATE (TACOMA, WA) -- The Green Transportation Summit & Expo, the largest mobility show in the Pacific Northwest, and RE+ Events, producer of RE+, the largest clean energy event in North America, will partner in 2024 and co-locate their respective shows in Tacoma, Washington, August 20-22.

The **Green Transportation Summit & Expo or GTSE**, as it is known among its attendees and others familiar with alt-fuel and zero-emission mobility, has provided fleet managers and advocates - including Clean Cities coalitions, clean-air advocates and policy makers - for more than 10 years a place in the Pacific Northwest to come together and learn more about alternative fuels and low- and zero-emission cars, buses and trucks. In 2023, it welcomed 1,000 attendees who learned from more than 75 exhibitors and 135 subject matter experts on mobility-related subjects, in addition to test drives of some of the latest light, medium and heavy-duty vehicles from some of the leading automakers, including Daimler Truck, Danner, Freightliner Custom Chassis, Kenworth, Mack, Motiv, Nikola, Paccar, Peterbilt, Rivian, Volvo, Westport and Workhouse.

“GTSE has a history of providing excellent content and a strong learning experience for its attendees,” noted Brian Trice, organizer of GTSE and executive director of the Columbia-Willamette Clean Cities Coalition. “As a result, last year we welcomed more than 1,000 attendees, drawing people from the Pacific Northwest and across the U.S.”

GTSE is also noted for its pioneering focus on environmental justice, workforce development, and an agenda that features a broad spectrum of renewable, zero, and low-carbon fuels. In 2023, it expanded its focus to include the emerging discussion of carbon reduction, carbon credits and trading through its Great Western Carbon Conference.

RE+ Events will co-locate their first event in the region – **RE+ Northwest** – with GTSE at the Greater Tacoma Convention Center. The convention center has served as the home for GTSE for seven years. The company, co-owned by the Solar Energy Industries Association (SEIA) and the Smart Electric Power Alliance (SEPA), produces RE+ (formerly SPI), the largest clean energy show in North America, in addition to region-focused and international events. In 2023, the event welcomed 40,000 to Las Vegas to learn more about solar, wind, microgrids, energy storage and hydrogen. In 2024, more are expected to attend in Anaheim, California.

Green Transportation Summit & Expo

“This partnership gives us the opportunity to welcome Northwest stakeholders to a familiar and trusted learning experience paired with a new show produced by a recognizable leader in the clean-energy area,” said Stephen Miner, CEO of RE+ Events. “Each of us brings unique strengths to this partnership and I think our attendees will respond enthusiastically to the complementary and expanded content we will offer.”

“Partnering with RE+ Events brings together the best of these shows, and it will enable GTSE to give our attendees a stronger mobility and clean-energy experience,” said Trice.

About GTSE

The Green Transportation Summit & Expo (GTSE) is the Pacific Northwest’s leading fleet modernization and sustainable transportation event. GTSE offers attendees an inside look at the latest in the fleet technologies and innovation and provides educational sessions which feature a who’s who of national and regional transportation leaders. GTSE is the region’s best resource for fleets, community organizations, industry, policymakers, and thought leaders to join to advance green transportation. The event includes three days of networking, educational sessions, and vehicle walkthroughs and test drives.

About RE+ Events

RE+ Events is a global event management organization with a focus on the clean energy industry. Our flagship event, RE+ 2023 (formerly SPI), is the largest renewable energy event in North America. The RE+ Events portfolio also includes U.S. regional events with a focus on trends and policies in specific states or regions, as well as international events that bring together leaders in developing clean energy markets across the world. RE+ Events is co-owned by the Smart Electric Power Alliance and the Solar Energy Industries Association.

RE+ 2024 will be held September 9-12 in Anaheim, CA. Learn more at re-plus.com. For all RE+ regional events, including RE+ Northwest, visit re-plus.events.
