

Green Transportation Summit and Expo 2023 Showcases Exciting Innovations in Advanced Clean Mobility

Tacoma, WA – A highlight of the Green Transportation Summit and Expo (GTSE) is the opportunity to be hands-on, driving the latest technology available for fleets. The 14th GTSE (August 22-24) promises to take this experience to new heights, offering attendees with the appropriate licenses to drive the latest zero and near-zero vehicles, such as Volvo Truck's VNR Electric Class 8 truck (pictured right), Kenworth's T680FCEV Hydrogen Fuel Cell Truck, and Freightliner's HD Electric e-Cascadia.

The GTSE, a regional hub for cutting-edge clean transportation technologies, will hold its Ride-and-Drive program on August 22, 2023, at the Tacoma Dome, Washington. Industry experts, government officials, innovators, and advanced technology enthusiasts from around the world will experience the latest advancements in clean fleet and sustainable transportation.

Attendees will experience Volvo Group North America's electric vehicles (EVs), including Volvo Truck's VNR electric class 8 truck, Mack Truck's LRe electric refuse hauler (pictured below), and Volvo Construction Equipment's electric wheel loader and 23 ton excavator. This unique opportunity allows visitors to drive the future of emissions-free transportation right in the Pacific Northwest.

In addition to Volvo Group, GTSE 2023 welcomes partners, such as Peterbilt, Kenworth, Paccar Parts, and Freightliner, renowned for their contributions to advancing clean mobility.

The summit is designed to showcase the diverse technology and fuels available today. Experts from the participating companies will be on hand during the Three-Day Summit to answer questions and insights into innovative technologies.

Alternative fuel enthusiasts can explore exhibits showcasing advancements in alternative fuels, as well as their economic and environmental benefits. Attendees will be able to witness the integration of hydrogen, electric charging, and renewable fuels into various transportation modes through mobile alternative fuel demonstrations.

New this year, GTSE 2023 partners with Neste to demonstrate the use of Neste MYRenewable Diesel, a drop-in replacement for fossil diesel that reduces greenhouse gas emissions without sacrificing performance further promoting clean alternative fuels in the Pacific Northwest.

Don't miss the opportunity to be part of this historic gathering at GTSE 2023. Register at gtsummitexpo.com/registration now to secure your spot and be at the forefront of zero-emission transportation.

About Green Transportation Summit and Expo: The Green Transportation Summit and Expo is an annual event dedicated to exploring and promoting sustainable transportation solutions. With a focus on alternative fuels, electrification, and innovative technologies, GTSE brings together industry leaders, government officials, and stakeholders to drive the transition to a greener transportation future.
